

FINAL TERM SHEET – TERMS AGREED

Strategic Cost-Share, Equity Allotment & CTO Appointment

Between

Sarvodya Life Skills Pvt Ltd
(represented by Akanksha)

and

CKR Technologies Pvt. Ltd.

Version: 3.0 (Final) | Date: 17 July 2026

ALL COMMERCIAL TERMS BELOW ARE FINAL AND AGREED.

This term sheet becomes legally binding upon execution of the definitive Share Subscription Agreement and CTO appointment letter giving effect to the terms agreed here.

Document Status

Field	Detail
Document Type	Final Term Sheet – Equity Allotment & CTO Appointment (Terms Agreed)
Legal Status	All commercial terms below are final and agreed by both parties. This term sheet itself is not a Shareholders' Agreement, Share Subscription Agreement, or Employment/Appointment Contract, and becomes legally binding only upon execution of those definitive documents.
Related Document	Business Requirements Document – Evenly Mobile App, Backend Integration & AI Whiteboard (v1.1, 17 July 2026), Section 11.2
Parties	Sarvodya Life Skills Pvt Ltd (“Company”) and CKR Technologies Pvt. Ltd. (“CKR Technologies”)
Next Step Required	Execution of the definitive Share Subscription Agreement, Cap Table amendment, and CTO appointment letter reflecting the final terms below

■ **Cost-share, equity, CTO, governance, and governing-law terms in Sections 2–5 and 8 below are final and agreed by both parties. They become legally binding once captured in the definitive Share Subscription Agreement and CTO appointment letter referenced in Section 9 – execution of those documents is the remaining step.**

1. Background

In connection with the Evenly mobile application, backend integration, and AI Whiteboard engagement, both parties have agreed that CKR Technologies will bear 50% of the development cost of that engagement, restricted to Phase 1–3 of the project timeline only, in exchange for a 5% equity stake in the Company, and that Chandan Mallik, co-founder of CKR Technologies, will serve as Chief Technology Officer of the Company for a period of 3 years. This document sets out the agreed terms for that arrangement.

2. Development Cost-Share

Item	Term
Total Development Cost (base, excl. GST)	INR 18,50,000
Cost-Share Duration / Cap	CKR Technologies' 50% cost-share contribution applies only to Phases 1–3 of the BRD timeline (backend audit through AI Whiteboard build & integration). Phases 4–5 (assessments/analytics/ERP integration, QA, UAT & go-live) are billed to the Company at full standard rates with no CKR Technologies contribution.
Contribution – CKR Technologies	50% of the cost attributable to Phases 1–3 only – satisfied by way of discount against milestone billing for those phases, not a cash transfer to the Company
Company Contribution	50% of the cost attributable to Phases 1–3, plus 100% of the cost attributable to Phases 4–5 – payable per the 40-30-20-10 milestone schedule in the BRD, net of CKR Technologies' Phase 1–3 contribution
Operational & Running Costs	Excluded from CKR Technologies' contribution. Hosting, third-party API costs, and all operational costs remain the Company's responsibility.
Marketing Costs	Excluded from CKR Technologies' contribution in all cases.
Interaction with Audit Outcome	If the backend code audit (BRD Section 4) returns a Red rating, this cost-share is subject to renegotiation before further milestone payments are due.

3. Equity Allotment

Item	Term
Instrument	Equity shares of the Company, 5% of fully diluted share capital as of the allotment date
Recipient	CKR Technologies Pvt. Ltd. (entity, not individual founders)
Vesting	None. The 5% equity stake is fully allotted to CKR Technologies upon signing of the definitive Share Subscription Agreement; no vesting schedule or cliff applies.
Dilution Protection	Protected. The 5% stake is anti-dilution protected and will not be diluted in future fundraising rounds without CKR Technologies' separate written consent.
Buy-back / Reversal Trigger	Because the equity is fully allotted with no vesting, early-exit protection is structured as a repurchase right rather than a forfeiture-of-unvested-shares mechanic: if Chandan Mallik voluntarily exits the CTO role before completing the 3-year term, the Company holds the right to repurchase CKR Technologies' full 5% stake at nominal/par value. This repurchase right does not apply if the Company removes him without cause, or if he exits due to the Company's material breach.
Documentation Required	Share Subscription Agreement, amended Cap Table, Board & shareholder resolutions

4. CTO Appointment – Chandan Mallik

Item	Term
Appointee	Chandan Mallik, Co-founder, CKR Technologies Pvt. Ltd.
Role	Chief Technology Officer, Sarvodya Life Skills Pvt Ltd
Term	3 years from appointment date
Reporting Line	Reports to Akanksha Bhargava, CEO & COO, Sarvodya Life Skills Pvt Ltd
Time Commitment	Part-time
Compensation	The CTO role is not separately compensated. The 5% equity stake under Section 3 is the sole consideration for this appointment.
Early Exit / Removal	If Chandan Mallik voluntarily exits the CTO role before completing 3 years, the repurchase right in Section 3 applies. If the Company removes him without cause, or he exits due to the Company's material breach, no repurchase right arises and the equity is retained in full.
Conflict of Interest	Chandan Mallik's continuing role as co-founder of CKR Technologies (an active vendor to the Company) should be disclosed and governed by a conflict-of-interest policy, given CKR Technologies will simultaneously deliver and be technically overseen by its own co-founder acting as the Company's CTO.

The conflict-of-interest point above is not a formality – having CKR Technologies' co-founder sit as the Company's CTO while CKR Technologies is the paid vendor on the same project means the person approving CKR Technologies' technical delivery and the person delivering it are financially aligned with each other, not with the Company alone. Recommend an independent technical reviewer or board oversight for sign-off on CKR Technologies' own deliverables during the CTO term.

4.1 Detailed Role, Responsibilities & KPI Framework

This framework replaces any prior summary of scope or KPIs for the CTO role and applies in full, notwithstanding the "Part-time" time commitment noted above.

A. Technology Strategy & Architecture

- Develop and execute the Company's long-term technology vision aligned with business objectives, educational outcomes, and growth strategy.
- Design highly scalable, secure, cloud-native, and high-availability architecture capable of supporting millions of concurrent learners across web, mobile, and future platforms.
- Establish enterprise architecture standards, engineering best practices, API-first design, and microservices architecture.
- Evaluate, adopt, and integrate emerging technologies such as AI, Generative AI, Adaptive Learning, Machine Learning, AR/VR, Blockchain, Learning Analytics, and IoT to create innovative learning experiences.
- Build technology roadmaps that support product innovation, global expansion, and long-term sustainability.
- Ensure interoperability with third-party platforms including LMS, ERP, CRM, payment gateways, government education systems, and enterprise applications.

B. Product Development & Engineering

- Lead the complete Software Development Life Cycle (SDLC), from ideation and architecture to deployment, monitoring, and continuous improvement.
- Deliver secure, high-quality, and scalable applications across Web, Android, iOS, desktop, and offline-first environments.
- Establish Agile, Scrum, and DevOps practices to accelerate product delivery.

- Build CI/CD pipelines, automated testing frameworks, and robust release management processes.
- Ensure platform performance, reliability, scalability, and maintainability.
- Collaborate with Product, UX/UI, Curriculum, Operations, Sales, and Customer Success teams to deliver impactful educational products.
- Drive continuous innovation while maintaining engineering excellence and code quality standards.

C. Artificial Intelligence, Automation & Intelligent Agents

- Lead the Company's AI strategy and embed AI across products and internal operations.
- Design and deploy AI-powered learning solutions, including adaptive learning engines, intelligent tutoring systems, personalized learning paths, automated assessments, and predictive analytics.
- Develop and manage an ecosystem of AI agents (Student Tutor, Teacher Copilot, Parent Support, Admissions, Sales & CRM Follow-up, Assessment & Evaluation, Content Creation, HR & Recruitment, Finance & Billing, Customer Support, Operations & Scheduling, and Data Analytics/BI agents) that automate key business functions without proportional increases in manpower.
- Build multi-agent orchestration frameworks that enable secure collaboration between AI agents.
- Implement Human-in-the-Loop (HITL) workflows for critical educational and business decisions.
- Ensure AI systems are transparent, ethical, explainable, secure, and continuously monitored for accuracy and bias.

D. Cost Optimization & Operational Efficiency

- Drive technology cost optimization across infrastructure, cloud services, licensing, software subscriptions, and engineering operations.
- Implement FinOps practices to optimize cloud spending through auto-scaling, monitoring, resource allocation, and cost governance.
- Reduce operational expenses through automation, AI-driven workflows, and process optimization.
- Improve engineering productivity by streamlining development, testing, deployment, and maintenance.
- Optimize cost per active learner while maintaining world-class user experience and platform performance.
- Identify opportunities to replace repetitive manual processes with AI agents and intelligent automation.
- Establish KPIs for infrastructure efficiency, cloud utilization, engineering productivity, and operational savings.

E. Data Privacy, Security & Cybersecurity

- Establish enterprise-grade cybersecurity frameworks to protect student, parent, teacher, and institutional data.
- Implement encryption, identity and access management (IAM), zero-trust security architecture, vulnerability management, penetration testing, and disaster recovery.
- Develop secure authentication, authorization, and data governance policies.
- Conduct regular security audits, compliance reviews, and risk assessments.
- Build resilient backup, business continuity, and incident response systems.
- Ensure security-by-design across all products and services.

F. Legal, Regulatory & Compliance

- Ensure compliance with global and regional regulations, including GDPR, COPPA, FERPA, ISO 27001, SOC 2, local data protection laws, and AI governance / digital education regulations.
- Oversee technology-related legal matters including software licensing, intellectual property protection, open-source compliance, and vendor agreements.
- Develop policies for consent management, data retention, cross-border data transfers, AI governance, and audit readiness.
- Work closely with legal teams to maintain privacy policies, terms of service, and contractual compliance.
- Ensure ethical AI deployment aligned with evolving regulatory requirements.

G. Infrastructure, DevOps & Platform Reliability

- Manage cloud infrastructure, networking, storage, databases, Kubernetes clusters, and containerized environments.
- Implement Infrastructure as Code (IaC), automated deployments, monitoring, logging, tracing, and observability tools.
- Design systems capable of handling peak learning periods, examinations, and large-scale assessments.
- Maintain Service Level Agreements (SLAs) with 99.9%+ uptime objectives.
- Ensure rapid disaster recovery, failover mechanisms, and business continuity.
- Continuously optimize platform performance, latency, scalability, and reliability.

H. Leadership & Engineering Management

- Recruit, mentor, and retain world-class engineering, AI, DevOps, QA, Data Science, and Cybersecurity teams.
- Build and scale engineering organization structure, career paths, and performance management practices.
- Foster a culture of innovation, ownership, technical excellence, and continuous learning.

I. Innovation & Competitive Advantage

- Continuously evaluate emerging technologies that can create competitive advantage.
- Lead innovation initiatives to improve learning outcomes, operational efficiency, and customer experience.

J. Stakeholder Engagement & Business Strategy

- Act as the primary technology advisor to the CEO, Board of Directors, investors, and strategic partners.
- Present technology roadmaps, AI strategy, cybersecurity posture, engineering performance, and innovation initiatives.
- Support fundraising, enterprise sales, government proposals, and strategic partnerships through technical leadership.
- Align technology investments with business growth, profitability, and customer success objectives.
- Translate complex technical concepts into strategic business value for executive stakeholders.

K. Key Performance Indicators (KPIs)

Technology & Engineering

- Platform uptime $\geq 99.9\%$
- Product release velocity
- Application response time
- Defect escape rate
- Engineering productivity
- Deployment frequency
- Mean Time to Recovery (MTTR)

- Platform scalability during peak usage

AI & Innovation

- AI feature adoption rate
- AI agent task automation percentage
- Accuracy of AI recommendations
- Student learning outcome improvements
- Teacher productivity gains
- AI-generated content utilization

Cost & Operational Efficiency

- Reduction in cloud infrastructure costs
- Cost per active learner
- Operational cost savings through automation
- Engineering cost optimization
- Support ticket reduction through AI agents
- Cloud resource utilization efficiency

Security & Compliance

- Zero critical security incidents
- Successful regulatory audits
- Compliance with GDPR, COPPA, FERPA, ISO 27001, and SOC 2
- Data breach prevention and response metrics

Business Impact

- Customer Satisfaction (CSAT)
- Net Promoter Score (NPS)
- School onboarding time
- Customer retention rate
- Revenue enabled through technology initiatives
- Technology ROI
- Employee retention and engineering engagement
- Time-to-market for new features

5. Governance & Information Rights

- The 5% equity does not carry a board seat or board observer rights.
- CKR Technologies will receive standard minority shareholder information rights (financial statements, cap table updates) in its capacity as a shareholder.
- CKR Technologies has no veto or consent rights over major corporate actions (fundraising, sale of the Company, etc.).

6. Termination & Contingency

- If the backend code audit under the BRD returns a Red outcome, both the cost-share (Section 2) and equity allotment (Section 3) are subject to renegotiation before proceeding.
- If the underlying development engagement is terminated for cause by either party, the 5% equity is subject to the repurchase right in Section 3.
- If Chandan Mallik's CTO appointment ends before the 3-year term, the treatment of the equity follows Section 3 (repurchase right on voluntary exit; no repurchase right on removal without cause or exit due to the Company's material breach).

7. Confidentiality

Both parties agree to keep the terms of this document, and any definitive agreement that follows it, confidential and not disclose them to third parties other than professional advisors, without the other party's written consent.

8. Governing Law

This term sheet and any definitive agreement arising from it will be governed by the laws of India. The courts having jurisdiction over the Company's (Sarvodya Life Skills Pvt Ltd) registered office, as recorded in its incorporation documents, will have exclusive jurisdiction over any dispute arising from or relating to this arrangement.

9. Disclaimer & Next Steps

This term sheet records the final, agreed commercial terms between the parties for the cost-share, equity allotment, and CTO appointment described above. It has not been drafted or reviewed by a qualified lawyer and does not constitute legal advice, and it does not by itself create, transfer, or vest any equity, employment, or governance right. Both parties should engage independent legal counsel to execute a definitive Share Subscription Agreement and a formal CTO appointment letter reflecting these agreed terms before any equity is allotted or the CTO role commences.
