

Credit Bureau (CIBIL/Experian) Report API

Overview

This API allows users to fetch a customer's credit bureau report and credit score using PAN, name, mobile number, and customer consent.

Endpoint

Production URL

POST `https://api.meon.co.in/api/v1/public/cibil/v1/request/`

Authentication

The API requires the following headers:

Header	Required	Description
X-API-Key	Yes	API key provided by Meon
X-Signature	Yes	HMAC signature generated using request payload
Idempotency-Key	Yes	Unique key to prevent duplicate requests
Content-Type	Yes	Must be <code>application/json</code>

Request Headers

```
X-API-Key: <API_KEY>
X-Signature: <SIGNATURE>
Idempotency-Key: <UNIQUE_KEY>
Content-Type: application/json
```

Request Body

Parameters

Field	Type	Required	Description
pan	String	Yes	Customer PAN Number
name	String	Yes	Customer Full Name
mobile	String	Yes	Registered Mobile Number
consent	String	Yes	Customer consent flag (☐ Y / ☐ N)

Sample Request

```
{
  "pan": "ABCDE1234F",
  "name": "John Doe",
  "mobile": "9876543210",
  "consent": "Y"
}
```

cURL Example

```
curl -X POST 'https://api.meon.co.in/api/v1/public/cibil/v1/request/'
-H 'X-API-Key: <API_KEY>'
-H 'X-Signature: <SIGNATURE>'
-H 'Idempotency-Key: <UNIQUE_KEY>'
-H 'Content-Type: application/json'
--data-raw '{
  "pan": "ABCDE1234F",
  "name": "John Doe",
  "mobile": "9876543210",
  "consent": "Y"
}'
```

Success Response

HTTP Status

200 OK

Response Structure

```
{
  "data": {
    "pan": "EEKPA5709E",
    "name": "CHIRAG AWASTHI",
    "mobile": "8368795328",
    "client_id": "credit_report_experian_xxxxxxxx",
    "credit_score": "693",
    "credit_report": {
      ...
    }
  },
  "message": null,
  "success": true,
  "status_code": 200,
  "message_code": "success"
}
```

Response Fields

Root Level

Field	Type	Description
success	Boolean	API execution status
status_code	Integer	HTTP response code
message	String/Null	Error or informational message
message_code	String	Response status code
data	Object	Credit report details

Data Object

Field	Type	Description
pan	String	PAN number provided
name	String	Customer name
mobile	String	Mobile number
client_id	String	Unique report reference ID

Field	Type	Description
credit_score	String	Bureau credit score
credit_report	Object	Complete bureau report

Credit Report Summary

Score Information

Field	Description
BureauScore	Bureau generated score
FCIREXScore	Experian credit score
BureauScoreConfidLevel	Confidence level of score

Account Summary

Field	Description
CreditAccountTotal	Total credit accounts
CreditAccountActive	Active accounts
CreditAccountClosed	Closed accounts
CreditAccountDefault	Defaulted accounts
Outstanding_Balance_All	Total outstanding balance

Enquiry Summary

Field	Description
CAPSLast7Days	Bureau enquiries in last 7 days
CAPSLast30Days	Bureau enquiries in last 30 days
CAPSLast90Days	Bureau enquiries in last 90 days
CAPSLast180Days	Bureau enquiries in last 180 days

Account Details

The `CAIS_Account_DETAILS` array contains detailed loan and credit account information:

Field	Description
Account_Number	Masked account number
Subscriber_Name	Lending institution
Account_Type	Type of credit account
Open_Date	Account opening date
Date_Closed	Account closure date
Current_Balance	Outstanding balance
Amount_Past_Due	Overdue amount
Account_Status	Current account status
Highest_Credit_or_Original_Loan_Amount	Original sanctioned amount
Payment_History_Profile	Repayment history

Match Result

Field	Description
Exact_match	Indicates whether customer details matched bureau records (☐ Y / ☐ N)

Error Response Example

```
{
  "success": false,
  "status_code": 400,
  "message": "Invalid PAN Number",
  "message_code": "invalid_pan"
}
```

Response Codes

HTTP Code	Description
200	Success
400	Bad Request

HTTP Code	Description
401	Unauthorized
403	Forbidden
422	Validation Error
429	Rate Limit Exceeded
500	Internal Server Error

Notes

1. Customer consent is mandatory before fetching a credit report.
2. PAN, Name, and Mobile Number should match bureau records.
3. Use a unique `Idempotency-Key` for every request.
4. Store credit bureau data securely and comply with applicable data protection regulations.
5. Credit reports contain sensitive customer information and should be handled according to compliance guidelines.
